Professional Experience

About me

Passionate Web Developer and UI/UX Designer with experience building modern, responsive, and user-focused websites and web applications. Skilled in front-end and back-end technologies, with a strong understanding of user interface principles and database integration. Committed to delivering clean, efficient code and seamless user experiences.

2025

–

2026

- Designed and developed multiple responsive websites focused on usability and modern UI principles.
- Built functional web applications using HTML, CSS, JavaScript, Python, and Flask.
- Integrated backend logic with MySQL databases to support dynamic content and user data.
- Collaborated with clients/stakeholders (if any) to refine design requirements and ensure high-quality delivery

Additional Skills

- Additional Skills
- Version control with Git/GitHub
- Testing with Jest and React Testing Library
- Agile/Scrum teamwork, Jira/Trello for project management
- CI/CD pipeline setup for continuous integration & deployment
